

Davis Baking Powder

Davis Baking Powder is manufactured by Clabber Girl Corporation, the leading retail baking powder producer in the United States. The 5 lb. container is easy to carry and stackable for better storage. The tight fitting lid keeps moisture out, so our double-acting baking powder has great shelf stability.

Use Level

Davis has the same CO₂ gas release as the majority of double-acting bakery and institutional type baking powders. For various types of baking products, use the typical amounts. For very light products you may need 6% or a little more.

Ingredients

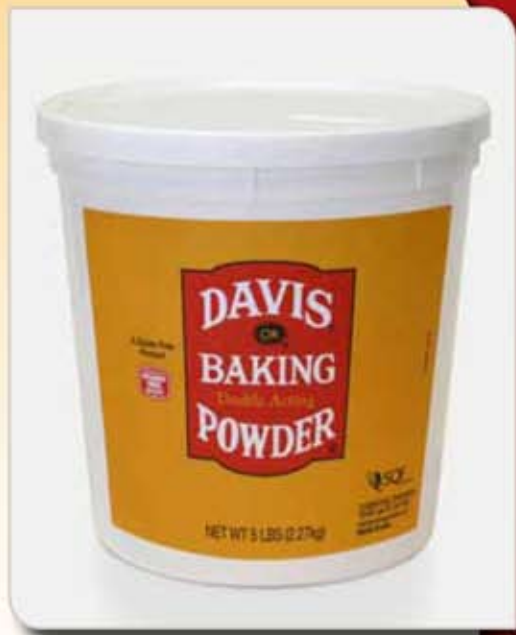

Davis Baking Powder contains food grade cornstarch, sodium bicarbonate (baking soda), anhydrous sodium aluminum sulfate and monocalcium phosphate.

Leavening Action

Leavening CO₂ is released by the reaction of the sodium aluminum sulfate and monocalcium phosphate in the presence of moisture. About 30% is released at batter temperature, and the rest is released in the oven.

Storage

Store in a cool, dry place and keep container tightly closed. Heat and moisture are harmful and should be avoided.

Davis Double-Acting Baking Powder

Nutrition Facts

Serving Size: 1/8 Teaspoon (0.6g)

Amount Per Serving:	% Daily Value*
Calories 0
