

Double-Acting Baking Powder

Now you get the original Fleischmann's Baking Powder from another industry leader; Clabber Girl. This is the same dependable, high-quality SAPP formula that bakeries, hotels, restaurants and institutions trust to produce baked products with excellent grain and texture.

Benefits

- Great for operations which require mixing large batches of batter for baking later in the day.
- Suited for applications requiring refrigeration.
- Perfect for general baking purposes such as cakes, muffins, tortillas and more!

Experts On Hand To Serve You

Our baking experts are available to develop special leavening agents or to formulate and test recipes for your kitchen.

Use Level

Fleischmann's Baking Powder has the same CO2 gas release as the majority of double-acting bakery and institutional type baking powders. For various types of baking products, use the typical amounts. For very light products you may need 6% or a little more.

Ingredients

Fleischmann's Baking Powder contains sodium acid pyrophosphate, sodium bicarbonate (baking soda), food grade corn starch and monocalcium phosphate.

Leavening Action

Leavening CO2 is released by the reaction of the sodium bicarbonate with monocalcium phosphate in the presence of moisture. About 8% is released at batter temperature, and 92% is released in the oven.

Storage

Store in a cool, dry place and keep container tightly closed. Heat and moisture are harmful and should be avoided.

Fleischmann's Baking Powder
